

Perfect cutting - fast and easy

The perfect cut requires precision. Which is why Fellowes® SafeCut™ Paper Trimmers and Guillotines are engineered with high performance cutting edge accuracy that safely and easily ensures a perfect cut every time.

Select the right cutting system

Personal 1 User Occasional Usage

Small Office / Home Office 1-2 Users Moderate Usage

Large Office / Office 3+ Users Frequent Usage

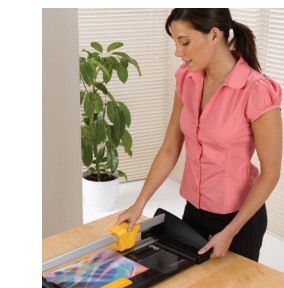

Paper size

Fellowes offer cutting systems with 2 different sizes of entry A4 and A3. The larger the width, the more flexibility there is to trim different sized documents.

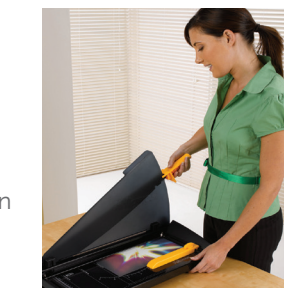

Types of cutting system?

ROTARY TRIMMERS
Ideal for precision cutting and trimming. The round blade enclosed in a cutting head slides along a metal guide bar to create straight cuts. High quality rotary trimmers engineered for safety and precision with TUV/GS safety accreditation to ensure excellent results and cutting edge performance.

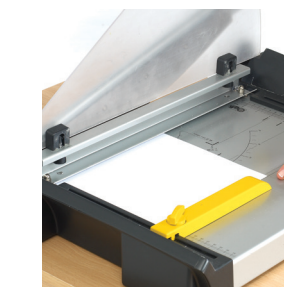

GUILLOTINES
A premium solution, designed for high-volume cutting. The leverage handle is brought down in one motion to cleanly cut through paper. Engineered for safety, with no assembly required.

What can a cutting system be used for?

IN THE WORKPLACE

- Presentations
- Paperboard
- Laminated documents
- Foam board
- Large volumes of paper
- Leaflets

IN THE HOME

- Photographs
- Greeting cards
- School artwork
- Scrapbooks
- Posters

Features that will make your job easier

SafeCut Extension
Retractable safety blade is only exposed when trimming, ensuring maximum safety and ease of use.

SafeCut Guide
LED safety guide facilitates precision cutting and is safer than laser alternatives.

SafeCut Guard
Protective safety guard prevents mishandling during operation.

SafeCut Blade
Heavy duty, stainless steel rotary blade, encapsulated for user safety.

4 BLADES
Supplied with four different types of rotary blades: straight, wavy, perforated and fold.

Perfect binding - fast and easy

For high quality binding results, the cutting edge features of Fellowes binding machines offer perfect binding performance that's faster and easier. Just align, punch and bind.

Select the right binder

Personal 1 User Occasional Usage

Small Office / Home Office 1-2 Users Moderate Usage

Large Office / Office 3+ Users Frequent Usage

Type of binding system

COMB BINDING
The most popular and economical binding system, it's practical, easy to use and very flexible.

WIRE BINDING
Stylish, durable wire binders with unique, user-friendly features. Ideal for office use, providing the best solution for a professional finish.

THERMAL BINDING
Thermal binding creates a professional, book-like finish to a printed document.

Consider punch & binding capacity

Fellowes binders are segmented according to how often they will be used and the size of the documents they can bind, which is measured on binding capacity, punch capacity and the maximum comb / wire size that can be accepted.

BINDING CAPACITY
The higher the binding capacity, the larger the document you can bind.

PUNCH CAPACITY
The higher the punching capability of the binder, the quicker the process. (Comb & Wire only).

MAX. ELEMENT SIZE
Maximum comb/wire diameter suitable for use with the binder. (Comb & Wire only).

Manual & electric punching machines

MANUAL PUNCHING
Strong metal punch handle on Fellowes machines makes it easy to punch through documents.

ELECTRIC PUNCHING
Provides ultimate ease of use. Electric punch button makes it easier to punch through large documents and also work through large quantities of documents quickly.

Features

Fellowes binders are equipped with many user-friendly features which make them simpler and quicker to use.

Thermal binders

Satellite SYSTEM
SATELLITE removable binding platform allows multiple users to punch and bind simultaneously, saving time in the workplace.
Available only on Galaxy and Galaxy E.

HeatShield
A safety barrier designed to prevent accidental contact with the heating plate. The barrier is opened manually and closes automatically.

Sleep MODE
Switches to stand by mode after periods of inactivity, reducing energy consumption.

THERMO SENSE
Automatically detects thickness of documents to determine the correct heating time.

Perfect lamination without the wait

Fellowes truly automatic laminators are the fastest to the finish. Simply feed any pouch in for perfect lamination every time.

Select the right laminator

Personal 1 User Occasional Usage

Small Office / Home Office 1-2 Users Moderate Usage

Large Office / Office 3+ Users Frequent Usage

Document size

A4 Laminates A4, A5, A6, photo's and smaller sizes

A3 Laminates A3, A4, A5, A6, photo's and smaller sizes. Also, laminates A4 SuperQuick pouches for fast lamination.

Pouch thickness

Pouch Thickness	Level of Protection	Documents & Notices	Photos	Hobby & Craft	Certificates	Menus	External Signage
Enhance80	Basic	✓	✓	-	-	-	-
Impress100	Everyday	✓	✓	✓	-	-	-

Features to keep you covered

JAM FREE
Advanced roller technology ensures consistent, hassle free lamination

InstaHeat
Rapid warm-up in 30-60 seconds for increased productivity

AUTO SENSE
Detects pouch thickness and instantly self-adjusts to the optimal laminating setting

HOT SWAP
Allows users to immediately switch between different pouch thickness

HeatGuard Technology
Keeps the heat inside so machine is comfortable and safe to the touch

AUTO SHUT OFF
Powers down after periods of inactivity, reducing energy consumption

REVERSE
Allows access to the laminator's rollers

Feed IQ™
Alerts user when they can insert their next pouch for maximum productivity

Advanced Pouch Tracking System™
Detects and reverses pouch in case of jam

AUTO REVERSE
Detects misfeeds and automatically reverses document flow for easy removal

REVERSE
Reverses rollers to disengage pouch for re-centering or removal

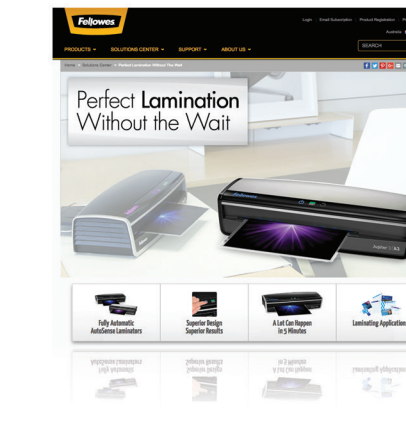

JAM RELEASE BUTTON
Releases the tension between the rollers to allow pouch removal
