*Combination of several units, depending on the airflow required. It is perfectly possible to combine ceiling and wall units. It is always possible to divide each zone into several separate areas.

- The treated space is considered to be correctly ventilated, in accordance with the air renewal rates specified by regulations.
- Do not position a unit less than 3m away from an exhaust opening.
- Wall-mounted units can be combined with recessed and ceiling-mounted units for uniform treatment of large spaces.
- It's always possible to split each zone into several separate areas.
